

Bias media is at an all time high. Propaganda machines are not being properly challenged by the FCC. The FCC is aware of Sinclair Broadcasting's plan to force their stations to air an anti-Kerry documentary days before the election. The FCC needs to put a stop to this obvious propoganda. This type of prostitution of our democracy has much heavier consequences than that of revealing Janet Jackson's breast during the super bowl. Why is not the FCC stopping this broadcast from happening. You have the advantage of knowing in advance. I am not holding this view because I am in favor of Kerry (I am not), I am in favor of fair elections.

Sinclair in particular is, by law, obligated to serve the intrests of the public. The airing of the anti-Kerry campaign does not serve the public's intrest but line their pocket books with the advertising money. This needs to be dealt with immediately to show large companies that they may be at liberty to choose the actors that appear on their shows, but they cannot dictate who the president should be. It would be more effective to have local forums and debates between citizens over who "should" be president.

Please stop this propoganda from disgracing the democracy that the United States attempts to uphold.

Thank You.
